Technical Skills

- Languages: C, C++, Python (basic)
- Web Development: HTML, CSS, JavaScript, React.js (beginner), Flask
- Database: MySQL
- Concepts: Data Structures, Algorithms, DBMS, Operating Systems, COA, Java, CN, DAA, Web Development, Python for Data Science

- Tools: Git, GitHub, VS Code

Language

- English
- Marathi
- Gujarati
- Hindi

Certifications and Achievements

- Participant, CVMU Hackathon 2025 (February) — Built the Scholarship Finder project in a 36-hour hackathon, focusing on usability and backend efficiency.
- Machine Learning Certificate – Talent Battle (2024)

Objective

Third-year Computer Engineering student at Madhuben and Bhanubhai Patel Institute of Technology (CVMU), passionate about software engineering, scalable systems, and AI-powered web development. Seeking an SDE Intern position at Amazon to apply problem-solving and full-stack skills while learning to design customer-centric, distributed systems.

Education

- Bachelor of Technology - Computer Engineering**
Madhuben and Bhanubhai Patel Institute of Technology, CVM University 2023 - 2027
CGPA: 9.72 (Till 4th Semester)

Projects

- Data Download Duplication Alert System (DDAS)**
Python · Flask · SQLite
Built a Flask-based file download system to prevent redundant downloads within a shared network. Implemented an MD5 hashing mechanism to detect duplicate files and notify users with existing file locations. Designed local and shared storage management, automatic metadata logging in SQLite, and in-browser file viewing for improved collaboration.
- Education Advisor Web Application**
React.js · Flask · Google Gemini API · MySQL
Developed an AI-powered web platform that helps 10th and 12th-grade students choose academic streams. Created a dynamic React quiz interface to assess interests and aptitudes, integrated Flask with Google Gemini API for personalized recommendations, and stored user data in MySQL. Delivered a responsive UI and intelligent decision support system for Science, Commerce, and Arts streams.
- Scholarship Finder Web Application**
HTML · CSS · Python · Flask · MySQL
Developed a responsive and interactive web application to help students discover relevant scholarships based on their profiles. Built a Flask backend integrated with a MySQL database to handle user input, filter results, and deliver real-time recommendations. Designed an intuitive frontend using HTML and CSS with a smooth scroll interface, enhancing accessibility and user experience for students across India.
